CLOSE ATTACKS

Close attacks are special techniques which can only be used to when two fighters are right next to each other. These techniques fall into two basic categories: **Throws and Holds**.

Throws allow you to grab an opponent and toss them across the room. Some fighters can even do throws in mid-air. For example: It is possible for Ryu to grab Ken and throw him over his shoulder. To do the Shoulder Throw, Ryu must push forward against Ken and then you must push the L button on you control pad.

Holds allow you to grab an opponent and then smash them repeatedly. For example: It is possible for Blanka to bite Guile on the head. To do the Head Bite, Blanka must push forward against Guile and then you must push the L button on your control pad.

The close attacks for each character are listed in this manual. It is up to you to discover how to use these attacks effectively.

SPECIAL MOVES

Each character has developed his or her own special moves for use in battle. All the special moves for each character are listed in *The World Warriors* section of this manual. There are also descriptions telling you how to do these special moves.

Special moves are very powerful, but they are also very difficult to learn. It may take weeks of practice before you will be able to use these moves effectively. So, practice hard and don't give up!

Below is an example of the diagram for Ryu's Fireball. The arrows in the diagram indicate the necessary movements on the control pad. Please refer to the movement diagram if you are unsure of what the arrows mean.

Example: **Fireball**

Using the control pad, press    in one continuous motion and press any punch button.

(Using the control pad, press **crouch**, **offensive crouch**, **forward** in one continuous motion and press any button.)

THE TOURNAMENT BEGINS

Eight fighters from across the globe have come together to see which of them has the strength, skill and courage to challenge the mysterious Grand Masters. Each fighter has different skills and special moves, but it will take more than brute strength to earn the title of World Warrior.

Choose **GAME START** on the title screen and you will be able to select your champion for the tournament. As the tournament begins, your fighter will travel the globe to meet one of the seven other challengers. (If a friend wishes to challenge you during the tournament, he can press the **START** button on his controller to interrupt your game.)

When the match begins, you must use your punches, kicks and special moves to knock your opponent flat on his back. Each time you hit him, his energy meter will decrease. Once your opponents energy meter is totally red, he will be down for the count. Win two out of three bouts and you will be declared the winner and earn the right to face the next challenger.

USING THE V.S. BATTLE MODE

The V.S. Battle allows two players to have a STREET FIGHTER II competition and automatically keeps track of the results. When the title screen appears, push the control pad up or down to move the marker next to V.S. BATTLE and press the **START** button. When the next screen appears, each player can see his wins, losses and special K.O.'s for each character. Each player must then select the character they wish to use and press the **START** button to continue to the next screen.

On the next screen, there are two options; **HANDICAP** and **STAGE SELECT**. Player One can press his control pad up or down to highlight either the **HANDICAP** or **STAGE SELECT** option.

HANDICAP - When the **HANDICAP** option is highlighted, both players can press left or right on the control pad to select an attack level. The attack level determines the amount of damage a player's punches and kicks will do. The higher the attack level, the greater the amount of damage the punches and kicks will do.

This option allows two players of different skill levels to have an even match.

USING THE V.S. BATTLE MODE

STAGE SELECT - When the STAGE SELECT option is highlighted, Player One can select the location of the match by pressing the control pad left or right. This option allows you to select the location of your fight.

After all the choices have been made, Player One can begin the match by pressing the **START** button. The first player to win two bouts will win the match. Once the match is complete, a screen will show each players record with each character. At this time, Player One can press the SELECT button to chose to continue the match, quit the match or erase the records. If you continue the game, both players will return to the player selection screen and the process begins all over again.

USING THE OPTION MODE

The Option Mode allows you to change to certain parts of the game. When the title screen appears, push the control pad up or down to move the marker next to **OPTION MODE** and press the **START** button. When the next screen appears, push the control pad up or down to highlight the option you wish to change.

DIFFICULTY - This option changes the difficulty of the computer opponent. Push the control pad left or right to change the option. At Level 0 the computer controlled opponents are easy to defeat and at Level 7 they are very difficult to defeat. The difficulty level also determines if you will see an ending upon completion of the game.

TIME LIMIT - This option allows you to turn on or off the Time Limit. Push the control pad left or right to highlight either **ON** or **OFF**. If you select on, the fighters will have 99 seconds to knock each other out. If you select **OFF**, the fight will continue until one player is knocked out.

CONFIGURE - This option allows you to change the button configuration for your fighter's punches and kicks. Highlight the punch or kick you wish to change and then press the button you wish to use for that punch or kick.

USING THE OPTION MODE

STEREO - This option allows you to select either STEREO or MONOAURAL sound. Push the control pad left or right to highlight the option you wish to use.

MUSIC TEST - This option allows you to hear the various pieces of music used in the game. Press the **A** button to change the music number and press the **R** button to hear the music.

S.E. TEST - This option allows you to hear the various sound effects used in the game. Press the **A** button to change the sound effect number and then press the **R** button to hear the effect.

To leave the OPTION MODE with your new settings, simply press the **START** button on your control pad.
